

PHYSICIAN SEES CITY WITH ONLY A FEW CRIPPLES

Dr. Sobel Tells of Great
Benefits Derived From
Dr. Lorenz's Visit.

Thirty-five thousand crippled persons live in New York, and in one month 998 of them have been examined personally by Dr. Adolf Lorenz in the borough clinics established by the Health Department at the suggestion of The Evening World.

Two thousand others have been examined by city physicians.

Diagnoses have been made of all cases, and in nearly every instance recommendations have been made for treatment at city hospitals which hold out hope for partial or complete restoration of all of them to useful citizenship.

Figures on the numerical progress

of the Lorenz clinics were announced today by Dr. Jacob Sobel, Assistant Director of the Bureau of Child Hygiene.

Of the thousand who have already been examined Dr. Sobel believes nearly half have applied for treatment at city hospitals.

"We have no records," he said, "to show how many of those examined by Dr. Lorenz or ourselves have applied for treatment at the twenty-two hospitals equipped for orthopedic cases, but we believe that at least half of them have done so."

"We consider the figures remarkable in view of the fact that it has been such a short time since so many crippled people have been awakened to the fact that there is hope for them. Of course the publicity given to Dr. Lorenz's work has been responsible for their awakening, but the good effects of his work will be seen long after he is gone."

"Since nearly half of the 35,000 cripples in New York are children whose cases respond more readily to treatment, their parents should not delay too long bringing them to city hospitals. If all parents who have crippled children would bring them as in-patients for treatment to our institutions New York in time would have comparatively few adult cripples. We hope that the awakening of the public to the fact that something can be done for cripples will eventually bring this about."

WOMAN TRAVELLER TAKEN TO BELLEVUE

Mrs. Newcomb, Just From Washington, Held for Observation.

A woman described as Mrs. Christine Newcomb, forty years old, who said she lives at Bayview, near Troy, N. Y., was taken from the Travellers' Aid Society, at No. 465 Lexington Avenue, last night to Bellevue for observation.

The society, it was said, received a telegram from the Washington office asking that an agent meet Mrs. Newcomb, who was on her way from Washington, of the Pennsylvania station. She was taken to the society's rooms, where, it was said, she began to talk incoherently. She said her husband died two weeks ago and that their home was in Louisville, Ky.

Printed Crepes For Spring

Delightful are the colors of these new crepes just arrived in our Silk Department. The printed designs in white on colored backgrounds or in contrasting colors usually elect small dainty figures such as the one sketched above. These promise to be favorites for Spring, and it is small wonder, for they are

indeed very charming and Spring-like. Krepe Knit is a fascinating sports fabric which assumes the loveliest two colored effects or contents itself with a solid hue. Satin-backed Moire, another sports fabric, is particularly good in the bright, high shades for sports wear, such as red, green and orange.

Crepe de Chine, \$1.95 Yard

Almost endless number of colors, light and dark. 40 inches wide.

GROUND FLOOR

Drop-Stitch Voile

Makes the Daintiest of Frocks!

Have you seen these lovely new fabrics? Our most recent importation is truly a delight to the eye, for the colors are exquisite, whether they are pale tints—yellow tones and shades of orchid being the best just now—or bright, high shades. And the texture itself, so delicately sheer—with dropstitch patterns in stripes, checks or fine plaids—seems to add to the beauty of the coloring.

These fabrics inspire one to begin the summer wardrobe now.

Are You Going South?

If you are going South, of course, you will need two or three such frocks. In the Department you will find two or three frocks of other new fabrics, made up in the smartest advanced styles just to give you an idea of how charming the newest colored wash fabrics can be.

SECOND FLOOR

Bulgarian Colors on

Embroidered Organdie

Irresistibly gay in coloring are the crisp organdie flouncings and bands we have just received from France. Vivid reds, blues, yellows, and greens are effectively combined on white organdie, while paler colors are equally lovely on organdie of a delicate tint.

Collar Widths

These bands and edging add a most refreshing and distinctive touch to your serge frock or tailored suit. They're being worn too with sweater costumes by those who are wintering in the South, and many use them for vests on dark frocks.

\$1.25 to \$3 yard.

Dress Flouncings

Full skirt widths of organdie or batiste, embroidered in the same exquisite way. They make dainty summer frocks and you may buy the narrow widths to match, for collars or deep cuffs.

\$5 to \$12 yard
